

KOENIG & BAUER

Omega Magnus 165 – 230

Benefits

The flexible solution for high-output folding carton production using corrugated board

Process optimisation due to the flexible integration of peripheral systems before and after the gluing process

Performance and efficiency with maximum belt speeds of up to 300 m/min

Fastest makeready thanks to fully automatic processes and memory functions to support job changes

High flexibility for the processing of E-, B- and C-flute corrugated board grades, as well as double-wall corrugated and heavy board up to 1,200 g/m², in format widths from 260 mm to 2,300 mm

Intuitive touchscreen operating concept for ultimate ease of operation and process automation

Tailored automation solutions to match your individual production requirements

Precise, error-free folding and gluing for reduced waste and economical resource use – irrespective of the product type and shape

we're on it.

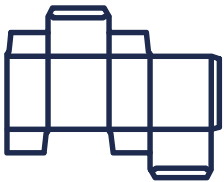

KOENIG & BAUER

The corrugated board specialist

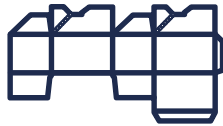

Robust and efficient, this is the corrugated board specialist in the Omega family – the Omega Magnus 165 – 230. Available in two different models, it handles a broad spectrum of corrugated folding cartons. Automation solutions and peripheral modules tailored to your individual needs guarantee fast makeready and top quality – and therefore precisely the performance your customers expect.

The Omega Magnus 165 – 230 will have you optimally equipped for the future challenges of folding carton production. After all: more corrugated, less plastic – that's where the packaging market is headed.

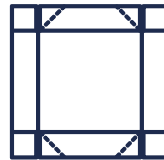

The Omega Magnus 165 – 230 is the perfect partner for even more flexibility in the processing of corrugated board. Produce economically and to the full satisfaction of your customers.
